SUMMARY

Software Engineer and Machine Learning practitioner - third-year B.Tech CSE student at Bennett University (CGPA 8.75) with hands-on production experience in backend systems, fraud detection, REST API development, and cross-platform mobile engineering. IEEE BU Chairperson leading 100+ members and ₹1.48L+ in secured sponsorships. Builder of MARI — a production-deployed fraud detection system trained on 284,807 transactions using a calibrated XGBoost ensemble with sub-100ms real-time inference and 0.9852 ROC-AUC. Published author. Experienced in agile methodology, CI/CD pipelines, and object-oriented programming. Focused on designing systems that are hard to break, easy to reason about, and built for scale.

EDUCATION

Bennett University, Greater Noida

Aug 2024 – Aug 2028

Bachelor of Technology – Computer Science & Engineering | CGPA: 8.75 / 10.0

Sunbeam School Varuna, Varanasi

2016 – 2023

Grade 10: 95% | Grade 12: 89% — Physics, Chemistry & Mathematics (PCM)

EXPERIENCE

Software Developer Intern · BuildIt Service

Mar 2026 – Present

Gurugram, Haryana

- Developing lead generation automation pipelines and REST API integrations for client acquisition workflows.
- Building client-facing web applications using modern JavaScript frameworks; contributing to backend architecture.
- Implementing internal dashboards and tooling to automate agency reporting using Python and SQL.
- Working in agile sprint cycles with cross-functional delivery teams across multiple concurrent client projects.

Application Developer (Flutter) · Raahi

Oct 2025 – Mar 2026

Noida, Uttar Pradesh

- Delivered a production cross-platform mobile application (iOS, Android, Web) serving students and young professionals using Flutter and Dart.
- Architected BLoC-pattern state management with secure local authentication, encrypted session handling, and SQLite-backed persistent storage.
- Shipped 4+ iterative sprint releases over 5 months; contributed to feature scoping, QA testing, and sprint retrospectives in a lean 4-person agile team.
- Optimised widget rendering and cross-platform UI transitions, achieving smooth 60fps performance across device targets.

Chairperson · IEEE Student Branch, Bennett University

Sep 2025 – Present

Noida, Uttar Pradesh

- Lead 100+ member IEEE student branch; secured ₹1.48L+ in sponsorships across Triverse 3.0 and chapter events through end-to-end sponsor negotiation and contract management.
- Organised Global AI Summit 1.0 & 2.0 — international AI conferences with 3,000–4,000+ total attendees across both editions, featuring industry leaders, researchers, and foreign dignitaries.
- Directed Triverse 3.0, a 3-day inter-college technical and cultural fest with 1,000–2,000 participants across 15+ events.
- Coordinated Zerodha Varsity Zonal Quiz as organising partner; conducted Faculty Development Programme (FDP) sessions bridging academia and industry.
- Managed 5 cross-functional verticals — events, sponsorship, research, technology, and editorial — across a team of 100+ core members.

- Led branch to **3rd place** — IEEE UP Section **Best Emerging Student Branch Award** 2025.

Previously: Junior Core — Tech & Research, IEEE Student Branch / CSI (Sep 2024 – Oct 2025) — event planning, speaker coordination, and member onboarding.

PROJECTS

Risk-Aware Fraud Decision System (MARI) Python · FastAPI · XGBoost · Scikit-learn · PostgreSQL · Redis · Docker · Railway mari-alpha.vercel.app | github.com/devantaris/mari

- Engineered a 3-layer fraud detection and decision system (risk assessment · predictive uncertainty · novelty detection) trained on **284,807** real-world transactions across 31 PCA-transformed dimensions with a **0.17%** fraud class imbalance.
- Implemented a 5-member calibrated XGBoost bootstrap ensemble paired with Isolation Forest anomaly detection; routes each transaction across 5 decision states: Approve, Step-Up Authentication, Abstain, Escalate, Block.
- Designed a cost-optimised routing policy with asymmetric loss functions and consequence-weighted thresholding; real-time inference REST API achieving **sub-100ms** latency per transaction under production load.
- Deployed on Railway with an interactive live demo on Vercel; evaluates 12+ behavioral, network, and temporal fraud signals per transaction with full explainability output.

Biome PWA React · TypeScript · Vite · Firebase · Electron github.com/devantaris/Biome

- Developed a cross-platform world-building productivity app (PWA & Desktop) with a focus timer, daily planner, real-time leaderboards, offline-first support, and a native Electron build.
- Architected a scalable backend using Firebase for cross-device synchronization, Google Authentication, and global progression tracking.

SkillSync Platform React · Node.js · Express · Supabase · Razorpay github.com/devantaris/SkillSync

- Built a full-stack peer-to-peer skill economy platform where users earn credits by teaching and spend them to enroll in courses.
- Implemented an AI-powered content validator to automatically score uploaded courses and maintain platform quality.
- Designed an end-to-end Razorpay payment flow and a scalable data model with Supabase PostgreSQL and Row Level Security.

PUBLICATIONS

Simply Universe — Co-authored book (Yash Sharma, Ishan Verma & Devansh Kumar). Published by Pothi Publications. *Explores astronomy and science concepts for a general audience.*

TECHNICAL SKILLS

Languages	Python, TypeScript, JavaScript, Dart, C++, Java, SQL
Frameworks	FastAPI, Next.js, React, Node.js, Flutter, Tailwind CSS
Machine Learning	XGBoost, Scikit-learn, Isolation Forest, Pandas, NumPy, Matplotlib
Databases	PostgreSQL, Redis, SQLite
DevOps / Tools	Docker, Git, GitHub Actions, CI/CD Pipelines, Linux, Railway, Vercel
Core Concepts	REST API Design, Backend Systems, Fraud Detection, Agile Methodology, OOP, ML Pipelines, Mobile Development

CERTIFICATIONS & TRAINING

IBM Machine Learning Professional Certificate	— IBM Issued Feb 2026 · Credential ID: TYJU31W22CSJ	Feb 2026
Ultimate Guide to FastAPI & Backend Development Specialization	— Packt / Coursera Issued Mar 2026 · REST APIs · PostgreSQL · OAuth2/JWT · Docker · AWS	Mar 2026
Vibe Coding	— Coding Ninjas 10X Club Issued Jun 2025 · Systems Design · Rapid Prototyping	Jun 2025
